

A LOVE FOR TWO WHEELS EVOLVING EVERY DAY. LET US PRODUCE THE BEST FOR YOU.

1961 - 2011 ANNIVERSARY

REGISTRED TRADE MARK

Ci sono motivi a noi peraltro sconosciuti, che spingono certi uomini a quardare un pò più in là: oltre le nuvole, oltre gli scogli, oltre i segreti. Nella loro testa, da sempre e comunque, si culla un obiettivo o un sogno che dir si voglia, e sanno perfettamente che prima o poi si avvererà o che lo centreranno, raggiungendolo.

There are reasons, that are unknow to us, that push certain people to look beyond. Beyond the clouds, beyond the cliffs, beyond their secret goals. Their objective is forever present and they know very well that they will reach this goal. Sooner or later.

President of

1922 - 2016

OBIETTIVO QUALITÀ TOTALE

Il cliente é il vero datore di lavoro dei dipendenti della Plastiche Cassano, non il principale.

E' necessario quindi, da parte di tutti, il massimo impegno e la massima onestà durante tutte le fasi della produzione al fine di ottenere la massima qualità.

Il cliente deve essere sempre soddisfatto della qualità del prodotto e del servizio globale reso dalla Plastiche Cassano.

Tra lavorare bene e lavorare male la differenza non è molta, ma gli effetti a lungo andare possono essere molto dannosi per tutti.

QUALITA' PLASTICHE CASSANO

- 1. ESPERIENZA DI 57 ANNI
- MATERIE PRIME DI PRIMA QUALITA' DA FORNITORI QUALIFICATI
- 3. CONTROLLO DI TUTTO IL PROCESSO PRODUTTIVO
- 4. DOPPIO CONTROLLO DEL PRODOTTO
- GARE DI CAMPIONATO MONDIALE COME TESTS DI COLLAUDO
- ASSICURAZIONE RESPONSABILITA' CIVILE SUI PRO-DOTTI

The customer is the real employer of Plastiche Cassano staff.

To give the customer the maximum satisfaction of service and quality, it is necessary that we all in Plastiche Cassano commit ourselves in full, with honesty and severe control during all phases of production in order to obtain the best of quality.

There is not much difference between working well or badly, but in the long term unsatisfactory results can be very damaging for us all.

FEATURES OF THE PLASTICHE CASSANO COMPANY

- 57 YEARS OF EXPERIENCE
- TOP QUALITY RAW MATERIALS FROM HIGHLY REPUTABLE SUPPLIERS
- QUALITY CONTROL IN ALL PHASES OF PRODUC-TION
- 4. THOUROUGH CHECK OF PRODUCTS
- WORLD CHAMPIONSHIP RACES FOR PRODUCTS TESTING
- 6. INSURANCE COVER ON PRODUCTS

QUALITA' PLASTICHE CASSANO SECONDO LE NORME EUROPEE EN- 29.000

Ecco come si realizza la qualità del prodotto Plastiche

Innanzitutto grazie all'esperienza, che la Plastiche Cassano ha accumulato da quando ha incominciato a produrre manopole in plastica nella vecchia sede in via Roma, 13 nel 1961, anno di iscrizione alla Camera di Commercio col n. 84585.

Ma i proprietari della Plastiche Cassano venivano dalla ditta del loro padre Assaghi Francesco, con sede in Cassano Magnago via Mazzel 42, fondata nel 1925 e produttrice di manopole in corno di bufalo, poi subito dopo la seconda guerra mondiale, delle prime manopole in plastica, bachelite e acetato.

Patete vedere le foto della vecchia fabbrica come era nel 1940. Allora si producevano circa 1.000 paia di manopole al giorno, oggi ne produciomo più di 100.000 paia al giorno, con un'esportazione del 70 %.

PRODUCT QUALITY CONSCIOUSNESS OF THE PLASTICHE CASSANO AS PER EN - 29,000

How we obtain the high standard of quality of our products:

1. Mainly we have acheved it through long experience. We started to manufacture our products in 1961, in the old factory of via Roma n.13. In the same year we became members of the Chamber of Commerce with number 84585. However the owners of Plastiche Cassano originated from the family business founded by the grandfather, Mr. Francesco Assaghi. The old company was founded in 1925 and was situated in Cassano Magnago, via Mazzel, 42. It was specialized in the production of handlebar grips made with buffalo horn. Immediately after World War II, the first handlebar grips in plastic, backelite and acetate were produced. (Please see the photographs showing the old factory in 1940). In those days the production capacity was of about 1.000 pairs of grips per day. Nowadays we produce over 100.000 pairs of grips per day. 70% of our products are exported worldwide.

2. Per secondo, é importante usare materie prime di prima qualità, acquistate da fornitori fidati e qualificati.

La Plastiche Cassano effettua il controllo di qualità sul materiale acquistato sia tramite prove interne, sia tramite laboratori esterni imparziali che rilasciano certificati di qualità. Il materiale è atossico come da norme En/71 e Reach. Lo stoccaggio delle materie prime, avviene in locali chiusi e non all'aperto, come fanno molti, per prevenire eventuali deterioramenti dovuti a cause atmosferiche.

 It is vital for us is to use raw materials of top quality, bought from highly reputable suppliers, with consistency of top quality. The raw materials comply with the European safety regulations. Standard EN/71 (non toxic) and Reach.

The Plastiche Cassano Company execute severe quality control over the raw material both in house, and at specialized laboratories which issue certificates of auality. Most of

TARREST STATE OF THE PARTY.

- Il processo di produzione è stabilito da norme scritte ben precise a disposizione e conoscenza di tutto il personale.
 Dalla progettazione delle attrezzature, alla spedizione della merce prodotto, tutto è prestabilito e controllato.
- 4. Il controllo dei pezzi prodotti avviene due volte: la prima, durante la stessa produzione, quando ogni operatore ha il tempo necessario e l'obbligo di controllare visivamente tutti i pezzi prodotti e ogni 100 pezzi deve effettuare il controllo dimensionale ed estetico con gli appositi strumenti. Una seconda volta i pezzi vengono poi controllati prima dell'imballo dove un'operatore effettua il secondo controllo dimensionale ed estetico di 3 pezzi ogni scatola, cioè circa ogni 100 / 200 pezzi secondo i modelli.

Per la spedizione si usano robusti cartoni di misura piccola o media per offrire una buona maneggevolezza ed una adeguata protezione dei pezzi durante il trasporto.

- The production process is established by firm written rules, and circulated to all our staff. From the tool making department to the produced goods departments, everything is properly planned and controlled.
- 4. The quality control of the produced pieces takes place twice:

the first one during the production phase, when each operator has the necessary time and the obligation of controlling every single piece produced, and every 100 pieces has to check the aesthetical and dimensional features with specialized instruments. The second quality control takes place before packing the products, when an operator performs a further control of dimensions and finishing of 3 pieces for every single carton, in total a check varying from 100 to 200 pieces according to the different model of grips.

The products are boxed in strong cartons of small or medium sizes in order to offer easy handling, and adequate protection during the transport.

5. Gare come test. La Plastiche Cassano da ormai 28 anni sottopone i propri prodotti, sotto il marchio ProGrip, al collaudo più severo e attendibile e cioè quello delle gare dei vari campionati mondiali. Da queste esperienze vengono tratti i suggerimenti per migliorare la

5. Tests during races.

produzione di serie.

For the last 28 years we have submitted our products marketed under the trade mark " Pro Grip", for race testing at events up to world championship level in three fields.

From these experienced champions we gather useful informations for ever improving the quality of our mass production.

Firm on the inside, Gel Density towards the palm of your hand and medium density on the ends.

In all Triple Density models, the hard density inner tube and the medium density grip ends flanges help towards maximum grip efficiency. Riders are always looking for SOFT GRIPS that don't slip on the bar. The rule in grip design is that the softer the material the more the grip will slip against the bar. Plastiche Cassano is the company that first offered duo density grips to the Motorcycle world and we try to bring new technical solutions to the market as the need arises. So we decided to design an even stronger inner sleeve to help minimize grip - MADE IN ITALY

POLARIZED LENS

NO FOG

Working principle: Natural light waves circulate in all directions and is, in fact, called diffused directions and is, in fact, called diffused light. When light meets a reflective surface (water, snow, sand, etc.) it is polarized, or organized in parallel planes. It is this concentration that creates the reflection and therefore the glare. The polarizing filter is oriented perpendicular to this plane in such a way that it absorbs the rays and eliminates the disturbing glare.

Maximum efficiency 99%

Suggested uses: The tint is a neutral color without any chromatic changes. The level of transmission makes the lens appropriate for use while driving.

Under certain conditions, the glare that is created by reflective surfaces (water, snow, sand, etc.) is such that eyesight is greatly limited and eye fatigue is increased.

MIMETIC LINING INSIDE

The use of extremely technologic fabrics and materials is what makes the production of Progrip inner linings special. The fabrics are accurately selected so that they can guarantee a very high humidity absorption, resist for a long time and maintain the same comfort through the time. Progrip fabrics are all made with a special antibacterial and anti-allergic treatment.

VENTILATION

Progrip ventilation systems directs cooling, drying air into the helmet, and use areas of low air pressure to the rear of the helmet to draw warm, damp air through the exhaust outlets and into the outside environment. The perfect placement and shaping of the inlets and outlets, along with air channels created within the liner, are the basis for optimum ventilation.

EMERGENCY CHEEK PAD REMOVAL SYSTEM

Allows easier access to an injured rider. By pulling the orange tabs integrated in the pads, the cheek pads slide out. Making helmet removal easier for trained medical personnel and rescuers and minimising the risk of additional injury.

HEATING CREAM EXTREME WARM-UP HEATING EFFECT CREAM

PRE-RACEHEATING CREAM has been formulated to combine the beneficial action of massage with the revitalizing properties of capsaicin which, in addition to acting on the relaxation of muscles and joints, improves local blood circulation.

This cream immediately creates a feeling of warmth that, just a few minutes from application tends to increase. In synergy with capsaicin the warming cream contains camphor that helps the mechanical action of the massage to firm and tone the body. This feature can last up to 40 minutes from application. The warming cream contains ingredients that help athletes before and after competitions to improve or restore muscle tone and is therefore very suitable for those who practice a lot of sport, especially in the coldest periods of the year.

الجو معل

SPORT ICE GEL has been studied to give immediate relief to parts of the body caused by greater fatigue and heaviness. Its formulation is based on the combination of Menthol Polar Bear which performs a decongestant action, in synergy with the Mentil Lactate, an ingredient that allows you to keep the feeling of freshness and lightness longer on the skin, giving immediately energy and tone. It is particularly indicated on hot days, after sport and for all those activities that require standing up for many hours of the day.

DECONGESTRAT S

RELIEVES TIRED BODY PARTS AFTER INTENSE ACTIVITY

DECONGESTANT GEL is a gel studied to give relief to the tired parts of the body, heavy and aching after sporting activities, restoring tone and vigor to the skin and muscles. The high content of red vine (30%), naturally rich in flavonoids, improves microcirclulation providing greater oxygenation and nutrients to adjacent tissues. In addition to carrying out the specific function of regenerating and decongesting tissues, it is rich in vegetable glycerine, a polyfunctional substance with important moistening and moisturizing properties. The formulation contains Menthol Polar Bear that thanks to its multiple properties performs the function of refreshing and decongesting affected parts, simulating a slight analgesic effect.

RELIEVES TRAUMA PAIN, SPRAINS, **MUSCLE CONTRACTURES**

SELLICE GET

THE ARINICA GEL 30% thanks to the high percentage of Arnica tincture (30%), the gel is able to perform an analgesic and decongestant action on the affected part, as well as giving an immediate sensation of enjoyable freshness that helps improve its function. The properties of Arnica make it to all effects a very effective natural anti-inflammatory. Applied to the skin it relieves pain and swelling associated with bruises, sprains, muscle and joint pain. It can be very helpful in reducing pain and promoting tissue healing.

POST WORKDUT RECOVERY GEL FAST BODY ENERGY REGAIN

POST WORKOUT RECOVERY GEL is a special gel containing 30% Echinacea extract that enriches the skin with nutrients and greatly improves its appearance. Its formulation contains a complex of Escin and Centella, always known for their vasoprotective properties that helps eliminate muscle heaviness. The complex of Escina and Centella has been studied in synergy with Cyclodextrin which acts as a vehicle increasing its function. Menthol in crystals completes the effectiveness of the product giving an immediate feeling of freshness and alleviating the perception of heaviness.
